Great. Thanks, Alice and Diane. I will reach out to the CAG to set up a planning call.

Subject: RE: CSTAG

FYI: Just spoke to Occidental-Glenn Springs. They would like the opportunity to present the following to the CAG at the July meeting:

- Pre-Design Investigation components and how they will be used in design
 - We will not have much sediment chemistry data yet, but there are other results that the CAG should be aware of, such as sediment texture maps, utility corridor investigations, shoreline photos, cultural resources investigation, etc....
- What is the design process?
 - What is the basis of design, what will the 30% design contain, etc...
 - What types of drawings will Glenn Springs-Tetra Tech be developing, etc...

This presentation can be as long or short as desired by the CAG, but for now we are thinking about 30 min (including presentation and Q&A).

P.S. I also sent an inquiry to Liz Butler, because one of the topics listed in our "upcoming meeting topics" slide back in March was Riverside. I'll let you know what she says.

Subject: CSTAG

Hi Shereen,

Our CSTAG response letter has been uploaded to SEMS. I have attached a copy here to share with the CAG and/or upload to ourpassaic.

Also, I wanted to talk about the next CAG meeting. Looking at the schedule we were supposed to discuss CSTAG, but we did that already at the last meeting. There is not much to update them on the upper 9 miles at this point. Perhaps if Alice has an update, they may want to focus on the lower 8? Maybe we should have a quick call. July 12 will be here before we know it and this is the vacation time of year, including my own the last week of June.
